

Distribution Statement A: Approved for public release:
distribution unlimited.

- FIRE MAIN** - Provides non-contact cooling water to vessels, which is discharged directly to Drydock Drainage System.
- PWCS** - Process Water Collection System collects dry dock stormwater and process water from the dry dock floor and pumps it to OWTS (> 75 NTU) for treatment or the sewer (0 – 75 NTU). Discharge through the drainage system to the bay is available if flow limits are reached.
- DRAINAGE SYSTEM** - Drydock drainage system pumps drydock relief groundwater and vessel non-contact cooling water directly to Sinclair Inlet.
